

1. Why is Patient involvement critical to success of the project?

- Generates more readable and understandable material - Quality information improves patients' health outcomes.
- Improves quality and safety – to better meet patient needs.
- Provides feedback for continual improvement – results in services that are more accessible and appropriate for users.
- Demonstrated improved clinical outcomes.

3. Outputs and Achievements

- Invitation to PBAC re Keytruda
- Invitation to Senate Inquiry re high cost cancer drugs
- Invitations to join other consumer initiatives
- Invitations to present at medical and scientific forums
- Peter Mac Community Award 2013
- MPA National Melanoma Award 2016
- Number of projects being done each year increasing
- Number of collaborative scientific papers increasing each year (per newsletter)
- 99% of MMP patients have been included in 1 to 15 research projects (per newsletter)

2. The MMP Collaboration Story

Patients involved at every level of the Project

(plus the AMCA initiative)

- Co-investigators on MMP funding applications
- Part of the MMP Governance Committee
- Consumer Reference Group (MMP sites, gender, rural, metro)
- Patient Cohort (to consult with)
